

QC-2 QUICK-CONNECT

TMI QC-2 series quick-connects, with double end shutoff, permit rapid connection and disconnection of vacuum hoses during vacuum bagging operations without loss of vacuum pressure. The QC-2 series Quick-Connects are interchangeable with Parker BH or Hansen HK/HDK series quick connects. With VITON, or optional silicone, o-rings in the female socket, the QC-2 offers excellent leak protection and service up to 500°F.

FEATURES

- Interchangeable with most major quick-connect couplings
- Fast disconnection of vacuum lines without loss of pressure
- Two-way valves in socket and plug stops flow when connection is broken
- Valve action automatically balances flow and provides instant shut-off
- Rotates 360° to prevent potential hose kinking and twisting
- Two O-rings in socket for double leakage protection during operation
- VITON O-rings standard, silicone O-rings optional, for service to 500°F
