

MOCATHANE™ CUTTING TABLE SURFACES

Mocathane™ Table Surfaces are made only from moca-cured urethane to ensure the highest quality at the lowest cost.

The durability of Mocathane™ lends itself to most cutting methods and in particular to ultrasonic knives that can damage and, in many cases, cut through non-moca urethane and other rubber table tops.

FEATURES

- Mocathane™ will not surface crack or curl due to aging.
- Average service life is two to three years.
- Self-healing characteristic reduces blade deflection caused by scarred working surfaces.
- Preferred surface for ultrasonic cutting systems.

General Data

Durometer:	85 Shore A
Maximum Size:	4' x 20' 5' x 20'
Standard Thickness:	1/4" (available in other thickness)
Color:	Transparent Black (standard) Orange Red Yellow
