

# RECONDITIONING

#### **A RECONDITIONED TOOL**

should offer the same performance and tool life as a new tool. AMAMCO reconditions tools using the same craftsmanship and the same precision machines and processes, to restore the tool to its like-new condition.

If reconditioning tools is part of your philosophy, AMAMCO can design this element into new tools, allowing you to maximize the number of reconditions, extend tool life, and save you money.

AMAMCO can also manage or help you develop a reconditioning program. We can manage the entire process, from your location to ours.

For help with reconditioning tools or an entire reconditioning program, please contact AMAMCO at [sales@amamcotool.com](mailto:sales@amamcotool.com) or 1-800-833-2239.
