## CURETAPE ${ }^{\text {TM }}$ TMF-27-10

CureTape ${ }^{\text {TM }}$ TMF-27-10 Patterning Cloth is an open weave fiberglass fabric coated with PTFE. It is used to impart a coarse pattern into part surfaces for secondary bonding.

This product has been designed for composite fabrication when excess resin or volatiles are to be evacuated.

The PTFE coating is inert to all known resin systems.

| PROPERTIES | SPECIFICATION |
| :--- | :--- |
| Breaking Strength | $250 \mathrm{lb} / \mathrm{in}$ width |
| Coated Weight | $0.77 \mathrm{lb} / \mathrm{sq}$ yd |
| Elongation | $5 \%$ |
| Fiberglass Style | 128 |
| Maximum Use Temperature | $600^{\circ} \mathrm{F}$ |
| Porosity | 5 CFM |
| Put Up: |  |
| $\quad$ Length | 100 yd |
