

Rohacell® Net-Shaped Machining Services

Technology Marketing, Inc. (TMI), headquartered in Salt Lake City, Utah is now offering machined net-shaped services for Rohacell® structural foam core. TMI has supplied and supported customers and programs using Rohacell® for over two decades. Our technical staff has an extensive knowledge supporting structural foam core requirements and are excited to be able to offer this new service.

High quality machined net-shape foam parts are attainable with the capabilities of a high precision 5-axis CNC machine. Our equipment has a table size of 125" x 80" with 36" in the z-axis. Any part requirements are possible from first article developments to shapes with complex geometry. We can support low and high volume quantities for any project. All parts produced are processed with expert support and the proper tools to assure the highest quality standards and certified to conform to the requested requirement or specifications. All net-shape foam parts are packaged in a sealed desiccant enclosed MIL-PRF-131 aluminum bag to mitigate moisture uptake during transit.

For over 48 years TMI has offered innovative quality products supporting the advanced composites industry. In addition to the new machined net-shaped services, TMI offers products from tooling, resins, cutting solutions, mold releases, processing materials, prepregs, woven & non-woven reinforcements, hoses, abrasives, drilling & routing tools, surface cleaning, shop accessories and more. Please visit our web site for additional information.
